# Capture Coating

(MVTR-A1 HVAC Air-Filtration Media Sealer)

Exclusive distributor of:  
**CURRAN BIOTECH**

**MVTR-A1** is a waterborne coating system for sealing porous and permeable HVAC air-filtration media

- MVTR-A1 is designed to mitigate and significantly decrease viral transmission of SARS-CoV-2 by forming a barrier against aqueous respiratory droplets that act as virion carriers.
- Suitable for application on pleated polyester, cotton, polypropylene, and/or fiberglass air-filtration media with a minimum efficiency reporting value (MERV) rating of 8 or greater

SDS available upon request  
Made using EPA compliant components

# Novālent

( AM RTU Surface Treatment )

## Estimated Coverage by Application (One Coat)

Sprayer	Square Feet/Gallon	Square Meters/Liter
Trigger	250	20
Pump-up	1000-1500	80-120
Fogger	2000-3000	160-240
Electrostatic	3000-4000	240-320

**Novalent® AM RTU** is a revolutionary broad-spectrum antimicrobial that provides protection against a wide range of microorganisms including bacteria and fungi.

- Once dry, the Novalent® AM RTU layer polymerizes onto the surface, leaving a microbiostatic layer that is effective for up to 90 days.
- Novalent® AM RTU is EPA registered and approved for food contact surfaces and hospital use.
- The most common method of application for Novalent® AM RTU is by spraying with a trigger sprayer, pump-up sprayer, backpack sprayer, or electrostatic sprayer (most effecient).
